

# Complex

## Associated BioPAX term(s)

Complex: <http://www.biopax.org/release/biopax-level3.owl#Complex>

## Recommended Glyph and Alternates

The RECOMMENDED glyph for a complex is a composite of the glyphs for the molecules of comprising the complex. For example, a protein bound to a small molecule, a guide RNA, or another protein:

An alternative is the SBN "cornered rectangle" glyph for a complex:

## Prototypical Example

Arabinose bound to AraC
