

Stability Element

Associated SO term(s)

SO:0001955 (Protein Stability Element)

SO:0001979 (RNA Stability Element)

Recommended Glyph and Alternates

The protein stability site glyph is a loop on top of a stem, suggesting the structure of a stabilizing hairpin secondary structure:

Prototypical Example

PEST tag, 3' Hairpin

Notes

The complementary RNA Stability Element glyph is identical except that its stem is a dashed line rather than a solid line.

The SO term for this glyph was previously tied to SO:0001957, which has been declared obsolete in Sequence Ontology.
